

# CONTENTS

## **The State of The Art in Hydroforming Technology in Japan**

*A. Tomizawa* ..... 1

## **Fundamentals, Innovations and Applications of Tube Hydroforming Processes in China**

*S. Yuan* ..... 13

## **Development and Applications of Hydroforming in Taiwan**

*C.K. Chung* ..... 25

## **Stress-Based Forming Limit Criterion for Tube Hydroforming**

*T. Kuwabara* ..... 36

## **Formability of tube hydroforming (I)**

### **Experimental and Numerical Study on Warm Hydroforming for T-shape Joint of AZ31 Magnesium Alloy**

*K. Manabe, K. Fujita, K.Tada* ..... 48

### **The Development of a Nonsymmetrical Shape and Large Variation-cross Section Tube by Hydroforming**

*L.X. Fan W.X Xin, G.H. Li* ..... 56

### **Research and Development of 600MPa Grade High Strength Thin-walled TRIP Steel Tube for Tube Hydro-forming**

*F.X. Zhu, Z.C. Zhang, L.Q. Chen, K. Manabe, J.L. Xue* ..... 62

### **Formability Evaluation of AZ31 Magnesium Tube under Warm Temperatures**

*T. Kuwabara, K. Takada* ..... 67

### **Evaluation of Fracture Property of Tube by Tensile Test Using Image Analysis**

*Y. Yoshida, N. Yukawa, T. Ishikawa* ..... 73

## Formability of tube hydroforming (II)

### Analysis of Forming Limit in Tube Hydroforming Process

*J.G. Park and Y.S. Kim* ..... 79

### Effect of Axial Tension and Mandrel on Working Property of Draw Bending for Extruded Aluminum Square Tube

*Y. Okude, S. Sakaki, S. Yoshihara* ..... 89

### Evaluation of Hydroformability of TRIP Steel Tubes by Flaring Test

*Z.C. Zhang, K. Manabe, F.X. Zhu, M. A. Mirzai, T.H. Li* ..... 95

### Formability Study of Magnesium Alloy Tubes in Warm Hydraulic Bulge Tests

*Y.M. Hwang, H. C. Chuang, K.H. Wang* ..... 101

### Crash Investigation of Side Intrusion Beam during High and Low Pressure Tube Hydroforming

*C. Nihare, M. Weiss, P. D. Hodgson* ..... 107

## Experimental/Theoretical results of tube hydroforming

### A Finite Element Analysis of T-shaped Tube Hydroforming Process

*F.K. Chen, R.H. Lin* ..... 113

### Cross-shaped Tube Hydroforming of Small Diameter Tubes

*A. Shirayori, M. Narazaki* ..... 121

### Optimization of the Shape through Hydroforming for Improving Durability of the CTBA Torsion Beam

*K.S. Kim, K.S. Jin, Y.G. Kim, S.M. Na, S. Namgung* ..... 127

### Study on the Influence of Process Parameters of Large T-Shape Tube Hydroforming with Finite Element Method

*W.C. Lee, C.T. Kwan* ..... 133

# Numerical simulation of tube hydroforming

<b>Effects of Draw Bending Conditions of Tube on Deformation of the Bend during the Subsequent Hydroforming Process</b>	
<i>K. Ishigaki, N. Sakaguchi, N. Kaneda, M. Kojima</i> .....	139
<b>Development of Hydroformed Rear Twist Beam for Light Commercial Vehicles</b>	
<i>S. Ali, S. Kumar, R. Natarajan</i> .....	145
<b>Finite Element Simulation and Experiment of Automobile Engine Cradle</b>	
<i>H. Su, H. Jiang, S. Guan, X. Chen, P. Fan, B. Yang</i> .....	150
<b>Estimating the Effect of the Forming Parameters on Bellows Hydroforming Using Finite Element Method</b>	
<i>S.Y. Lin, C.Y. Tsai, J.C. Shih</i> .....	156

# Sheet hydroforming

<b>Research on Mechanism of Formability Improvement in Pulsating Hydroforming of Tubes</b>	
<i>S.H. Zhang and A.Y. Yuan</i> .....	162
<b>Micro Bulging Process of Copper Sheets Using a Viscous Pressure Media</b>	
<i>C.C. Chang, J.C. Lin</i> .....	170
<b>Investigation of Optimum Process Parameters on the Sheet Hydroforming of Titanium / Aluminum Clad Metal for Battery Housing</b>	
<i>H.C. Tseng, Z.C. Wu, C.H. Hung, M.H. Lee, C.C. Huang</i> .....	176
<b>Study on Hydraulic Deep Drawing of Cylindrical Cups</b>	
<i>T.F. Hwang, X.X. Ke, Y.C. Chen</i> .....	182
<b>Finite Element Analysis and Experimental Investigation on Circular Tube-Pure Bending</b>	
<i>K. Takahashi, T. Kuboki, M. Murata</i> .....	188
<b>Parameter Identification of Elasto-Plastic Constitutive Models</b>	
<i>A. Öchsner</i> .....	194

# Hydrotribology, hydropiercing and hydrojoining

## **Analytical Models for the Characterization of the Guiding Zone Tribotests for Tube Hydroforming**

*G. Ngaile and C. Yang* ..... 200

## **The Development of Hydroformed Rear Twist Beam for the Automotive Chassis**

*C.K. Chiu Huang, P.K. Cheng, C.S. Lee, Y.T. Pan, and M.Y. Chang* ..... 208

## **Study on Outward Hydropiercing by Internal Hydraulic Pressure**

*M. Uchida, A. Tomizawa* ..... 214

## **Research on Hydroforming Tubular Parts with Dissymmetrical Structure**

*J.F. Lin, F. Li, S.J. Yuan, J.C. Han* ..... 220

## **New processes of hydroforming (I)**

### **Fracture Prediction in Complex Tube Hydroforming Process Using Fracture Energy Criterion**

*R.S. Lee, Y.J. Chen, P.K. Cheng, C.K. Chiu Huang* ..... 226

### **Hydro Forming at Elevated Temperatures**

*R. Neugebauer, F. Schieck* ..... 234

### **The Development of Chromoly Steel Bike Tubes by Hydroforming Process**

*C.Y. Chuang, C.C. Lee, C.K. Chiu Huang, P.K. Cheng, C.S. Liu, Y.T. Pan* ..... 240

### **Tube Hydroforming with Movable Dies**

*K. Sato, I. Hiroshige, K. Hiramatsu* ..... 246

# New processes of hydroforming (II)

## **Analysis of Hot Air Forming Process Using Aluminum Tube**

*H.Y. Kim, S.J. Yoon, G.D. Lee, T.J. Kim* ..... 252

## **Energy Efficiency Forming Technology for Tubular CTBA Using Hot Forming**

*Y.J. Zhang, K.D. Lee, T.J. Kim, H.S. Son, Y.S. Kim* ..... 258

## **Experimental and Numerical Study on Dieless Drawing Process of Aluminum Alloy Extruded Tubes with Double Hollow Section**

*T. Furushima, K. Manabe* ..... 264

## **The Finnish Hydroforming Project - Innovative Products and Laser Beam Manipulation on Tube Production**

*S. Kivivuori, M. P Vänskä, T. Torvinen*..... 270

## **The Development of Various Cross-Section Faucet by Tube Hydroforming Process**

*C.H. Lee, C.Y. Chuang, C.K. Chiu Huang, P.K. Cheng*..... 276

## **Design and Processing of Novel Hybrid Structure Tubular Heat Pipe for Photoelectric Components**

*S.C. Shen, J.C. Hsieh, C.T. Pan, H.J. Huang, H.J. Shaw*..... 282

## **A new approach for hydroforming tubular components simulation with experimental study**

*L. Wang, G.D. Wang, L.C. Chan and T.C. Lee* ..... 288
