

TABLE OF CONTENTS

Plenary Session

KEYNOTE PAPER

State of the art, visions & priorities in research & development on metal forming

T. Altan, Y. Aue-U-Lan, H. Palaniswamy, S. Kaya 3

KEYNOTE PAPER

Metal forming ensures innovation and future in europe

M. Geiger, M. Merklein, M. Tolazzi 25

KEYNOTE PAPER

Integrated development of metal forming technologies for ultra-fine grained steel sheets

M. Kiuchi 55

Blanking & Bending

INVITED PAPER

Enhanced finite element modelling and simulation of air bending

N. Ridane, M. Kleiner, B. Heller 73

Experimental and numerical study of ferromagnetic sheet punching: effect of velocity

E. Hug, H. Marouani, M. Rachik 75

Simulation for flat hemming of aluminum sheet metal

M. Murata, T. Kuboki 77

The effect of pushing force on the shear bending process of circular tubes

M. Goodarzi, T. Kuboki, M. Murata 79

Closed-loop control system for the three-roll-bending process based on methods of computational intelligence

U. Dirksen, S. Chatti, M. Hermes, M. Kleiner 81

Dynamic accuracy of a die and a press combined, on blanking of electronic machine parts

F. Sekine 83

Finite element simulation of blanked surface features in fine blanking process

S. Thipprakmas, M. Jin, M. Murakawa 85

Springback of high strength steel and aluminium alloy sheets in bending using CNC servo press

K. Mori, K. Akita, Y. Abe 87

CAE & Knowledge Engineering

INVITED PAPER

The application of UBET in several forming processes

J. S. Gunasekera, V. Ranatunga 91

Quality assurance for precision forging processes by process management and control of die wear B. A. Behrens, H. Daehndel, A. Huskic	93
Knowledge acquisition framework in building a mould & die design kbe system L. Dayong, Y. Jilong, P. Yinghong, Z. Fei, C. Zhaomin	95
Development of a total integrated support system of die design in cold forging - measurement system of internal elastic strain in a die and applications Y. Mure, K. Nakanishi, M. Ogawa, Y. Nakashima	97
Knowledge-based system for process planning and die configuration design in cold forging O. Takata, Y. Mure, Y. Nakashima, M. Ogawa, M. Umeda, I. Nagasawa	99
Development of the modern interface for fe analyses of plastic working by the concept of object oriented programming T. Yoshida	101
The influence of difference preprocessing methods using artificial neural network shape prediction Y. B. Chen, Z. Y. Jiang, H. T. Zhu, A. K. Tieu, M. Yang, K. Manabe	103
A gradient based technique for costs minimisation in impression die forging R. Di Lorenzo, V. Corona, M. Mandanici, F. Micari	105
A response surface based fem approach for improving quality of forging processes S. Kini, R. Shivpuri	107

Cold Forging

INVITED PAPER

Cold rotary forming of small module internal gears L.B. Aksenov	111
--	-----

INVITED PAPER

Research and development of precision forging in Japan K. Osakada, T. Nakamura	113
---	-----

Application of modified tools in the process of thin-walled tube drawing K. Świątkowski, R. Hatalak	115
--	-----

Optimization of die shape in drawing processes A.M. Camacho, E.M. Rubio, M.A. Sebastián	117
--	-----

Net shape cold forging of CVJ parts and steering parts K. Ito, K. Kondo	119
--	-----

Bar and wire with ultra-smoothing and lower residual stress by new drawing S. Kajino, M. Asakawa, T. Hatakeyama, T. Muraoka	121
--	-----

Cold piercing of cylindrical billet of magnesium alloy against counter pressure R. Matsumoto, T. Kubo, K. Osakada	123
--	-----

Manufacturing of laminated gear with cold die forging utilizing divided flow method	
K. Katoh, K. Kondo, N. Hayashi	125
Analysis of the dimensional changes from the die machining to final heat-treatment for cold forging	
Y.S. Lee, J.H. Lee, Y-N. Kwon, J.R. Cho, T. Ishikawa	127
Effect of the surface shape on the cold formability of steel workpieces	
F. Klocke, D. Breuer	129
A study on the cold forming of the connecting head for high pressure fuel injection pipe	
K. D. Hur, H. T. Yeo	131

Damage & Fracture

Detection of damage to and fracture of forging tool in operation using fractal property of acoustic emission	
K. Hayakawa, T. Nakamura, S. Tanaka, T. Nozue	135
Prediction of ductile damage in industrial cold and semi-hot forging with damage models and finite element simulations	
H. Just, A. Behrens	137
Study on top wire breakage by thermo- mechanical stress on LCD device	
T. Amimoto, M. Tsubokura, K. Akiba, H. Iwamoto, H. Murakami	139
Ductile fracture analysis with damage models of effective stresses at high temperatures	
C. Sommitsch, G. Rűf	141
Prediction of ductile fracture in bulk metal forming: an artificial neural networks based approach	
R. Di Lorenzo, A. Maniscalco, V. Corona, F. Micari	143
Damage localization prediction using the three-dimensional damage percolation model	
O.S. Orlov, S.L. Winkler, M. J. Worswick, D.J. Lloyd, M.J. Finn	145
Deformation analysis of micro-defects in plate rolling	
N. Yukawa, A. Koyachi, Y. Yoshida, T. Ishikawa	147

Deep Drawing

INVITED PAPER

Simulation of multi-step deep-drawing performed in transfer presses	
M. Tisza, Zs. Lukács, G. Gál, P. Kovács	151
Warm deep drawing of ferritic stainless steel sheet	
V. Premanond, P. Kaewtatip, R. Paisarn, N. Potjanmean	153
Deep drawing of AZ31 magnesium alloy sheets at high temperatures under isothermal conditions	
M. Sugamata, J. Kaneko, M. Kubota	155

Effect of a pulsating blankholder on material flow in deep drawing P.J. Bolt, R. Werkhoven, S. Ali, S. Hinduja, J. Atkinson	157
Springback prediction of sheet metal in the deep drawing process using elastoplastic phenomenological models B. Haddag, T. Balan, F. Abed-Meraim	159
Development of trunk lid outer using hydromechanical deep drawing process (HDD) Y. C. Choi, H. B. Kim, H. J. Lee, K. H. Oh	161
Investigation of a hybrid draw-forging process for thin walled magnesium parts Z.Q. Sheng, R. Shivpuri	163
Process analysis of the deep drawing of stainless steel rectangular cups F.-K. Chen, S.-Y. Lin	165
Deep drawing die platform including the multi-point die support system T. Ohashi	167

Dies & Tools

INVITED PAPER

Some developments in analysis of lateral forces and cyclic loading with relation to forging dies A. Kocańda, P. Czyżewski, P. Krzyszkowski	171
---	-----

INVITED PAPER

Investigation of advanced die materials and gradient surfaces for forming tools R. Shivpuri, S. Babu, Y. Wu, S. Kini	173
Focused ion beam micro-machining for WC-Co cemented carbides H. Hosokawa, K. Shimojima, M. Mabuchi	175
Experimental investigation on the influence of tool wear on cutting temperature in turning using tungsten carbide inserts P. Carlone, G.S. Palazzo	177
Researches on the elastic die for forging of gear parts T. Canta, A. Dragoste, D. Frunza	179
A proposal of "Progressive Stairs Die Working". (development of direct drive digital servo-press, 2 nd report). C. Murata, T. Machida, S. Futamura, J. Endou	181
Tool and die design for non-circular deep drawing process of aluminium sheet by the finite element simulation H. Moslemi Naeini, D. Javabvar, H. Amerizadeh, M. Mohammad Rezaei, A. Akbari, R. Mahshid	183
A model for the estimation of tmf life in hot forging G. A. Berti, M. Monti	185
Application of hard coatings to ironing dies K. Dohda, H. Kubota, Y. Tsuchiya, Y. Taniguchi	187

A simple measurement method of compression behavior of cemented carbide for cold forging die Z. Wang, H. Shiraga, N. Ueda, T. Matsumoto, M. Ohhashi, H. Nakagaki	189
Fatigue crack growth behavior of cemented carbide die in cold forging process Z. Wang, I. Nakashima, M. Ohhashi, T. Matsumoto	191
Correlation between metallurgical observations and numerical simulation of fillet-rollig in crankshafts N. Massué, H. Khanfir, L. Garcia Aranda, L. Taleb, E. Arnoult	193
Quality assessment of cold forging tools - measurement of the real prestressing by ultrasonics A. Putz, U. Engel, M. Geiger	195
Improvement of tool life and working accuracy in cold forging by numerical process simulation M. Arbak, R. Voelkl, U. Engel	197
Influence of dies design on the geometrical precision of hot forged turbine blades F. Zutton, A. Maurizio, A. Ghiotti, M. Croin	199

Extrusion

INVITED PAPER

Computer-aided optimization of metal forming processes as applied to 3-D extrusion of profiles D. Y. Yang	203
Extrusion of micro billets from metal sheets K. Hirota, K. Taguchi	205
FEM simulation and elasto-plastic analysis of porthole-die in extrusion hollow section aluminium tubes V. Mandic, S. Bruschi, T. Marinkovic, M. Zivkovic, M. Targa	207
Stability of steel seam-welded tubes forming process - experimental and numerical investigation V. Mandic, B. Misic	209
The extrusion and closed die forging process of nano-structured Al_3O_2 - ZrO_2 composite Z. Kaifeng, H. Wenbo, W. Guofeng, C. Guoqing	211
Three-dimensional curved profile extrusion D. Becker, A. Klaus, M. Kleiner	213
A study on the forming limit in the radial extrusion process B.S. Ham, D.H. Jang, H.J. Choi, B.D. Ko, J.H. Ok, B.B. Hwang	215
A new estimating method for void's generation and its growth in rod-rod combined extrusion M. Ono, E. Murai	217
Physical and numerical modelling of extrusion of flat sections from hard deformable aluminium alloys W. Libura, D. Lesniak, A. Rekas, J. Zasadzinski	219

On the processing through conical dies of bimetallic tubes under various contact conditions between layers A. G. Mamalis, G. L. Petrosyan, D. E. Manolakos, M. B. Safaryan, H. G. Petrosyan	221
Deformation characteristics and evaluation of die safety in forward and backward can extrusion process using a tube J.H. Ok, D.H. Jang, B.S. Ham, K.H. Min, J.M. Seo, B.B. Hwang	223
A study of material flow behavior during hot direct extrusion of brass A. Żmudzki, M. Nylén, W.B. Hutchinson, J. Tegnér, M. Pietrzyk	225
Extrusion welds in hollow AA 6060 profiles: fem simulation and product characterization. L. Donati, L. Tomesani	227
Manufacturing of Mg-alloy plates by extrusion with double shear M. Hoshino, Y. Uchida, K. Siegert	229

Forging Simulation

INVITED PAPER

Three-dimensional finite element modelling of new metal forming processes J. L. Chenot, E. Massoni, E. Wey	233
Numerical simulation of bulk metal forming processes using the reproducing kernel particle method X. Shangwu, J. M. C. Rodrigues, P. A. F. Martins	235
A study on the 2-D quadrilateral mesh generation B.B. Hwang, Y.H. Lee, J.H. Ok, B.S. Ham, H.S. Koo, J.M. Seo, D.J. Kim, D.H. Jang	237
An analysis for the improvement of forming process of a steel shell body Y.H. Lee, B.B. Hwang, T.K. Ryu, D.H. Jang	239
A new remeshing technique using tetra-hedral elements based on a posteriori error estimation and its application to the finite element simulation of metal forming processes J.T. Hong, S.R. Lee, D.Y. Yang	241
Automated design and finite element simulation of reducer rolling technology N. Biba, A. Vlasov, S. Stebounov	243
A new conformal hexahedral refinement technique for finite-element simulation of bulk metal forming processes C.H. Park, D.Y. Yang	245
A study on the frictional contact problems in large deformation D.H. Jang, B.B. Hwang	247
A contact detection algorithm between deformable bodies in 2-D finite element analysis D.H. Jang, B.B. Hwang	249
Rigid-plastic finite element analysis of aluminum extrusion processes based on rate-independent crystal plasticity K. J. Kim, D. Y. Yang, J. W. Yoon	251

Automated adaptive tetrahedral element generation for three-dimensional metal forming simulation M.C. Lee, M.S. Joun	253
Study on the key problems of 3D rigid visco-plastic fem simulation during non-symmetric tube hot spinning W.C. Xu, D.B. Shan, Y. Lu, C.F. Li	255
Three dimensional numerical simulation of cross-wedge rolling of bars F. Piedrahita, L. Garcia Aranda, Y. Chastel	257

Forming Simulation

INVITED PAPER

Modelling incremental sheet forming using a meshless surface representation based on radial basis functions G. Hirt, M. Bambach	261
Automatic generation of initial shape for initiation of optimal blank design sequences H. Shim, J.K. Lee, Y.S. Kim	263
Optimal blank design for complicated shapes using inverse finite element M.H. Parsa, S. Sokhanvaran, P. Pournia	265
Draw-bead analysis with 3-D shell element for the equivalent boundary condition in forming analysis J.H. Song, H. Huh	267
Roll forming simulation with solid shell element Y. Peng, D. Li, Y. Luo, F. Wang	269

Hot Forging

INVITED PAPER

Adding value to forged parts T.A. Dean	273
Metal flow characteristics when forming on a roll-platen machine W. Zhang, J. Lin, T.A. Dean	275
High-speed large-reduction hot forging process for producing ultra-fine grained steel sheets Y. Sodani, T. Kuroki, M. Miyake	277
Forming of complicated shapes by local heating M. Özmen, O. Okman, H. Huwiler, A. E. Tekkaya	279
Development of a simulation model of the rotary tube piercing process and fem application to improve the quality of seamless tubes E. Ceretti, C. Giardini, F. Brisotto	281
Finite-element simulation on opened-die forming of spur gear B.H. Zhang, Z.M. Zhang	283
Determination of heat transfer coefficient and thermal conductivity using the solution of inverse heat conduction problem A. Buczek, T. Telejko	285

Bulk forming of Mg-alloys AZ31 and AZ80 M. Düring, L. Schaeffer, B. Viehweger	287
Optimization with fem analysis in the hot forging process of undercarriage components A. Minguzzi, A. Rimbano	289

Hydroforming

INVITED PAPER

The potential and application limits of temperature-supported hydroforming of magnesium alloys R. Neugebauer, A. Sterzing, M. Seifert, P. Kurka	293
Process limits for exhaust pipe tube hydroforming C.Y.Chuang, C.C. Huang, F.L. Ming, P.K. Cheng, M.C. Tsai	295
Research on hydro-bulging a 200m ³ LPG tank B.G. Teng, S.J. Yuan, Z.R. Wang	297
Innovative method for welded tube characterisation and tube hydroforming process modelling L. Galdos, C. García	299
Hydroforming of magnesium sheet metal B. Viehweger, A. Karabet, A. Sviridov, M. Düring	301
Investigation into the innovative sheet hydroforming methods with uniform pressure onto the blank L. H. Lang, T.Li, X. B. Zhou, J. Danckert, K. B. Nielsen, S. H. Zhang, L. X. Zhou	303
Comparison of 2D and 3D prebending effect in aluminum tube hydroforming based on the formability evaluation H. Y. Kim, H. T. Lim, H. J. Kim, D. J. Lee	305
Research on the sheet hydro forming process using a movable die to apply local constraints S. H. Zhang, L. X. Zhou, G. Palumbo, L. Tricarico, L. H. Lang, J. Danckert, K. B. Nielsen	307

ICEM Special Session

Recycling scrap aluminium by cold-bonding J. M. Allwood, Y. Huang, C. Y. Barlow	311
An environmental evaluation of new technology for metal recycling H. Ono, T. Sano, Y. Nishizaki, T. Ohta, S. Ono, Y. Shirai, K. Hanada	313
Reduction of the environmental BURDEN caused by household appliances G. Gantar ¹ , E. Šehič ² , K. Kuzman ¹	315

Incremental Bulk Forming

INVITED PAPER

Efficient algorithms for the simulation of incremental bulk metal forming P. Groche, D. Fritsche	319
---	-----

Finite element analysis of orbital forming used in spindle/inner ring assembly M. Munshi, K. Shah, H. Cho, T. Altan	321
A periodic table of ring rolling processes J. M. Allwood	323
Numerical simulation of forging alloy 718 O. Harrer, S. Wallner, V. Wieser	325
Experimental validation of FE numerical model for ring rolling M. Pietrzyk, Z. Malinowski, W. Madej	327
The FEM analysis and optimization on the technology parameters of metal ring cold rolling forming X. Yuan, Z. Pengfei, Z. Wenjun	329
Rigid-plastic FEM analysis of deformation property in rotary forging T. Kawabe, S. Katayama	331
Finite Element analysis of a rotary forging process for bearing assembly H. K. Moon, M. C. Lee, J. H. Chung, M. S. Joun	333
Analysis of cold ring rolling process O. Music, V. Güley, M. S. Öztop, T. Savaş, F. Özhan, A. E. Tekkaya	335
A comparison between process parameters in die and roll drawing F. Lambiase, F. Capece Minutolo, M. Durante, A. Langella	337
Modelling material behaviour in incremental bulk forming processes S. Casotto, R. Icarelli, S. Bruschi, T. Dal Negro	339

Incremental Sheet Forming

INVITED PAPER

Incremental sheet forming simulation and accuracy Q. Qin, E.S. Masuku, A.N. Bramley, A.R. Mileham, G.W. Owen	343
Development of new incremental forming strategies for low-alloyed trip steels B. Mašek, H. Staňková, Z. Nový, L. W. Meyer	345
Incremental Sheet Metal Forming of Preformed Sheets R. Shankar, S. Jadhav, R. Goebel, W. Homberg, M. Kleiner	347
Incremental sheet metal forming process for pure titanium denture plate S. Tanaka, T. Nakamura, K. Hayakawa, H. Nakamura, K. Motomura	349
Sheet incremental forming: a new process configuration allowing controlled flow of the sheet material under the blank-holder G. Ambrogio, L. Filice, F. Gagliardi, F. Micari	351
Metal spinning of non-circular hollow parts B. Awiszus, F. Meyer	353
Development of an incremental forming center for sheet metal O. Sakai, S. Aida, T. Gotou, K. Magara, H. Iseki	355
A simple strategy for improving geometry precision in single point incremental forming G. Ambrogio, L. Filice	357

Joining by Forming

INVITED PAPER

- Modeling the effect of pin geometry in friction stir welding of aluminum alloys
G. Buffa, J. Hua, R. Shivpuri, F. Micari, L. Fratini 361
- Mechanical joining of thin aluminum sheets by roll forming and stretching
Y. Kasuga 363
- Development of large superalloy valve spindle by inertia welding process
H. C. Park, H. S. Jeong, J. R. Cho, Y. H. Kim, N. K. Lee 365
- Numerical modelling of friction stir welding: a grain size evolution model
G. Buffa, L. Fratini 367
- Joining fasteners in the calibration stage of the hydro-forming processes
M. Farzin, R. Shivpuri 369
- Hydro-joining for assembled camshafts and its applications
G. Liu, Q. Liu, S. J. Yuan, S. Q. Zhu, Q. B. Miao 371
- Finite element simulation of joining process of aluminium alloy and steel sheets using self piercing rivet
Y. Abe, T. Kato, K. Mori, X. Wu 373
- Friction stir spot welding of aluminum alloys
A. Barcellona, L. Fratini, D. Palmeri 375

Machines

INVITED PAPER

- Electromagnetic dampening of the cutting shock on sheet metal presses
B. A. Behrens, O. Marthiens, M. Werbs 379
- The impact of a mechanical press on the accuracy of products in cold forging
V. Krušič, M. Arentoft, T. Rodič 381
- Kinematic analysis of various mechanical press mechanisms
D. H. Jang, Y. H. Lee, J. H. Ok, B. S. Ham, K. H. Min, H. S. Koo, Y. S. Lee, B. B. Hwang 383
- Influence of stiffness on contact-time and temperature at dies surface in hot and warm forging: an experimental approach
A. Ghiotti, M. Croin, P. F. Bariani 385

Material Modelling

INVITED PAPER

- Effect of preheating and testing method on the flow stress of steels
M. Pietrzyk, R. Kuziak, M. Loveday, B. Roebuck 389
- INVITED PAPER**
- Analysis of force-indentation measurements on anisotropic metals
E. Koray, N. Topcu, A.E. Tekkaya 391

Analysis of hot workability of Ni-based superalloy waspalyo through hot compression tests F. Casari, I. Bovolo, S. Bruschi, T. Dal Negro, A. Molinari	393
A rate-dependent anisotropic behaviour of steel sheets C. Hwang, H. Hoffmann	395
Functionally graded properties by controlled thermo-mechanical interaction in metal forming processes U. Weidig, K. Bergmann, B. Scholtes, K. Steinhoff	397
Flow stress prediction during hot deformation of Nimonic 115 superalloy using empirical models C. Bruni, A. Cruciani, A. Forcellese, F. Gabrielli, M. Simoncini	399
Analytical model for the prediction of microstructure evolution in the hot forming of steel using severe plastic deformation J. Yanagimoto, A. Yanagida, J. S. Liu	401
Implementation of a non-isothermal material model for austenitic stainless steels in deep drawing simulation J. L. Avendaño, J. I. Fernández, E. Schedin, J. Kajberg, L. Staubwasser	403
Physically based material model in finite element simulation of extrusion of stainless steel tubes S. Hansson, K. Domkin	405
Essential relationship between the metal forming and the invariants of stress and deviatoric stress tensors Z. B. He, W. Hu, Z. R. Wang	407
Deformation analysis of shaving process of high strength steel Y. Yoshida, D. Okushita, N. Yukawa, T. Ishikawa	409
Finite element simulations of the swift effect L. Duchêne, F. El Houdaigui, A. M. Habraken	411
Analysis of luders band in temper rolling by continuum theory of dislocations K. Komori	413

Material Testing

INVITED PAPER

Modeling plastic anisotropy for metal forming F. Barlat, O. Cazacu	417
Plastic buckling behavior of cylindrical pipe of AZ31B magnesium alloy I. Fukuda, Y. Ohishi, T. Murai	419
Development of 980-1470MPa grade low alloy trip-aided sheet steels for automotive applications K. Sugimoto, T. Muramatsu, T. Hojo, S. Hashimoto, Y. Mukai	421
Determination of very-high-strain-rate properties of light metals by the plate impact experiment using three in-material gauges Y. Sato, T. Ueno, K. Ono, T. Nakano, T. Hasegawa, D. Hosoya	423
Deformation behavior of a new type Al-Mg-Si-Cu alloy L. Z. He, A. K. Tieu, C. Lu, Y. B. Chen, H. T. Zhu	425

Microstructural evolution and mechanical properties of ultrafine grained commercially pure 1050 Aluminum alloy processed by cross accumulative roll bonding (C-ARB) Y. -S. Kim, S. H. Kang	427
Effect of additional shear strain layer on mechanical properties of fine drawn wire S. Kajino, M. Asakawa	429
High strain rate behavior of microalloyed steels for automotive applications J. Majta, M. Stefanska-Kadziela, K. Muszka, A. Bator	431
Improved formability of intermetallic materials by superimposition of hydrostatic pressure C. M. Wichern, W. Rasp	433
Large straining behavior and micro structure refinement of metals by torsion extrusion process S. Mizunuma	435
Grain size refinement of magnesium alloys by warm deformation for ductility improvement Y. Tsuchida, M. Matsui, T. Inoue	437
Effect of strain path on recrystallization behavior of 1100 Aluminum sheet K. Mori, E. Nakayama, T. Sakai, H. Utsunomiya	439
Mechanical properties of repetitive side extruded and heat treated 0.5% carbon steels K. Aoki, A. Azushima	441
Microstructural evolution and super-plasticity of Al-Mg alloys deformed by warm multiple deformation process S. -B. Kang, J. -W. Kim, H. -W. Kim, I.-M. Park	443
 Microforming	
<i>INVITED PAPER</i>	
Simulation of microforming processes - an advanced approach applying a mesoscopic model U. Engel, S. Geißdörfer, M. Geiger	447
Optimum drawing conditions for shaped microwire of 100-400 μm size K. Yoshida, M. Maejima	449
Development of new piercing system for micro-holes by continuous striking of a punch using ultrasonic vibration T. Takemasu, S. Yamasaki, H. Miura, T. Ozaki	451
Investigation and application of size effects in the laser assisted forging of microparts with transparent tools J. P. Wulfsberg, M. Terzi	453
A study on size effects on process design of micro deep drawing X. Dong, N. Ma	455

Research on microforming apparatus and processes of microgears C. Wang, D. Shan, B. Guo, L. Sun	457
Analysis of cup geometry and temperature conditions in the miniaturized deep drawing process H. Justinger, G. Hirt, N. Witulski	459
Investigation of a notched upsetting test for forgeability evaluation of micro parts with high ductility R. S. Lee, Y. J. Chen, S. T. Wang	461
Structural analysis of a micro-former based on results from the forming analysis of milli-component J. H. Yoon, H. Huh, S. S. Kim, T. H. Choi, H. J. Park	463
Coining of surface microgeometry of combined cavities and projections S. H. Ike	465
Micro-forming modelling by using gradient plasticity and surface layer approaches N. Pernin, J. Chambert, P. Picart	467
Computational and experimental analysis of flow behavior of thin polymer film in spin-coating process B. H. Kim, J. K. Shin, J. H. Ban, H. Y. Kim, J. S. Lee, J. H. Lee	469
A Study on Micro/Nanopattern Fabrication of Nickel and Copper by Using Nanoindenter and Electroless Deposition Technique S. W. Youn, H. I. Kim, C. G. Kang	471
Finite element analysis of micro cup drawing process using tool and blank models with surface roughness K. Manabe, H. Koyama, H. Nouka, M. Yang, K. Ito	473
Micro-bending of magnesium alloy foils by spark forming M. Otsu, Y. Katayama	475
Plastic deformation of solderless press-fit connectors T. Manninen, K. Kanervo, A. Revuelta, J. Larkiola, A. S. Korhonen	477

Powder Forming

INVITED PAPER

Optimal design of material and process parameters in Powder Injection Moulding J. C. Gelin, G. Ayad, T. Barriere, D. Renault	481
Net Shape forming of dental prosthetic crown by DC pulse resistance- sintering process of titanium powder metal Y. Kubota, T. Nakamura, S. Tanaka, K. Hayakawa, H. Nakamura, I. Motomura, T. Funato	483
The bi-phase simulation of segregation in mim and phase behaviours B. Liu, T. Barriere, Z. Cheng, J.C Gelin	485
Experimental analysis of flow, stress and strain distribution in powder compaction Y. Murata, E. Yuasa	487
Several metal foam production processes using powder forming T. Shimizu, K. Matsuzaki, K. Hatsukano, K. Hanada	489

Rolling

INVITED PAPER

- Strip profile rolling – a new production process for tailor rolled strips
R. Kopp, G. Hirt, F. Jackel 493
- INVITED PAPER**
- FE model for prediction of strip profile in cold rolling
G. Bazzaro, N. Kapaj, M. Pavlicevic, L. Vignolo, C. Sepulveres 495
- Analytical solution of elastic cold rolling of strip as a lower bound for skin pass rolling
O. Pawelski 497
- Innovations in rolling quality-enhanced gear toothing
R. Neugebauer, U. Hellfritzsich 499
- Prediction of roll force and roll torque in shape rolling
S. Rijak 501
- Study on development of intelligent roll forming machine
H. Ona 503
- Investigation of edge seam defect of stainless steel during hot plate rolling
C. G. Sun, J. S. Lee, S. M. Hwang 505
- An improved algorithm for the analysis of strip rolling with relatively large roll deformations
A. Dixon, W. Y. D. Yuen 507
- Cold rolling of ultra thin strip during work roll edge contract
H. T. Zhu, Z. Y. Jiang, A. K. Tieu 509
- Effect of mechanical conditions in the roll gap on closing and welding of material discontinuities in groove rolling process
D. Woźniak 511
- Effects of rolling condition as roll roughness, rolling reduction and lubrication on surface appearance of strip after cold skinpass rolling
Y. Aramaki, M. Ataka, T. Okamoto 513
- Mathematical model for multi-physical process coupling analysis of strip hot rolling
X. Hong, Z. Guomin 515
- Prediction of microstructural behavior during hot rolling
L. Lissel, G. Engberg 517
- Development of width sizing technique with two steps die in a hot strip mill
D. H. Kim, S. H. Lee, S. M. Byon, H. D. Park, B. M. Kim 519
- Elastic-plastic theory of cold and temper rolling
H. Matsumoto 521
- Achieving feedback for cold roll forming design automation
M. E. English, M. Castellucci, D. J. Mynors 523
- Thermal behavior and strip shape in cold strip rolling
H. Ren, A. Kiet Tieu, C. Lu, H. Zhu, G. D'Alessio 525

Effects of indentation rate of rolling tool on the fatigue strength of groove-rolled products K. Kawai, H. Koyama, D. Miyazaki, W. Kim	527
A new cross rolling for spreading of thin strips and its application for texture control of aluminium S. Kaneko, K. Mori, H. Utsunomiya, T. Sakai, N. Furushiro, Y. Saito	529
Development of super short interval multi pass rolling technology for ultrafine -grained hot strip S. Fukushima, T. Sasaki, M. Eto, T. Shibahara, K. Miyata, M. Wakita	531
Characteristics of magnesium alloy sheet manufactured by roll-strip casting process H. Watari, R. Paisarn, T. Haga, K. Davey, N. Koga	533

Sheet Metal Formability

INVITED PAPER

Some remarks on material formability in single point incremental forming of sheet metal F. Micari	537
Forming limit analysis of anisotropic sheet-metal using a non-local plastic-damage model M. Brunet, F. Morestin, H. Walter-Leberre	539
Development of ultrafine piercing system T. Mori, S. Kurimoto	541
Influence of predeformation on the formability of Aluminium alloys M. Merklein, S. Beccari	543
Extension of forming limits by using a process combination of electromagnetic forming and hydroforming V. Psyk, C. Beerwald, W. Homberg, M. Kleiner	545
Experimental and analytical investigation on the forming limits of aluminum alloy tube K. Yoshida, T. Kuwabara	547
Press & blow formability of magnesium foils N. Koga, R. Paisarn, C. Kuan	549
Special features of the interaction between material properties and deformation conditions during sheet forming processes: microstructure strain localization R. Kawalla, S. Guk	551
Grain refinement of heat treatable Aluminum alloy sheets by resistance heat treatment M. Ishiguro, S. Maki, K. Mori	553

Sheet Metal Forming Operations

INVITED PAPER

Laser induced and laser assisted forming technologies F. Vollertsen	557
--	-----

Finite element model of roll forming of a U-channel profile M. Lindgren	559
Forming of magnesium alloy AZ31B sheet at room temperature M. Yamashita, M. Gotoh, J. Satoh, Y. Komada	561
Multi point sandwich forming Z. R.Wang, B. G. Teng, Q. Zhang	563
Numerical analysis of multi-point forming process of sheet metal Z.-Y. Cai, M. -Z. Li, X.-S. Song	565
Advanced numerical modelling of patchwork blank forming processes K. Lamprecht, M. Geiger	567
Numerical and experimental analyses of pin stiffness for blankholder pressure distribution control C. García, F. Martínez	569
Comparison between simulative and experimental results of necking operations on aluminium can A. Attanasio, E. Ceretti, C. Giardini	571
Method for preventing dimple defects on sheet metal in boss forming H. Murakami, B. Sasaki, S. Yoneoka, N. Ohtake, T. Yasuhara	573
Improvement of accuracies of shape and dimension for cylindrical cups produced by stretch - draw forming T. Muranaka, Y. Goto, N. Ito, K. Kawachi	575
Analysis on the spinning forces for 3D non-axisymmetrical thin-walled oblique tubes X. Qinxiang, C. Xiuquan, L. Baixiang, Z. Saijun, R. Feng	577
Workpiece properties in high-pressure sheet metal forming of sheets with pre-defined thickness distribution R. Krux, W. Homberg, M. Kleiner	579
Working surface design and control in multi-point forming of sheet metal Z. Sui, C. Liu, M. Li, X. Cui	581
3D finite element analysis of surface roughness and friction in hot strip rolling Z. Y. Jiang, A. K. Tieu	583
Optimum drawbead setting for springback control in sheet metal forming S. Abe, R. Hino, F. Yoshida	585
Influence of biaxial pre-strain on the bake hardening effect and strength of hot rolled multiphase steels H. Palkowski, T. Anke	587

Surfaces

Nano/micro-indentation, scratching and atomic force microscopy of rheoformed Al-Si-Mg alloy for characterization of surface deformation behavior S. W. Youn, S. H. Cho, C. G. Kang	591
---	-----

Dry sliding wear characteristics of hot- pressure sintered cobalt and cobalt-base composites Y. S. Kim, S. H. Kang, T. W. Kim	593
Development of evaluation methodology for surface deflection defects employing directed and ranged curvature difference T. Moriya, S. Takahashi	595
Direct Observation of Asperity Deformation of Specimen with a Smooth Surface in Indentation Process A. Azushima, S. Kuba	597
Analysis of geometrical tolerances and surface roughness of the spinning process with regard to size effects P. Groche, R. Schäfer	599
Shaping fit of hard materials using shot peening Y. Harada, S. Ujihashi, K. Mori	601
Influence of machining parameters on surfacial strain hardening G. D'Urso, G. Pellegrini, G. Maccarini, A. Bugini	603

Thixoforming

INVITED PAPER

Semi-solid forging of aluminium alloy using rapid resistance heating K. Mori, K. S. Maki	607
Rheocasting and squeeze casting for aluminium near-net-shape automotive applications R. Villa, P. Giordano	609
Semisolid forging of 7000 Series Aluminium alloys Z. Azpilgain, I. Hurtado, R. Ortubay, A. Azpiazu, G. Basterrechea	611
Influence of input heat on microstructure in mushy state forging of A357 Aluminum alloy using resistance heating S. Maki, H. Shibata, K. Mori, H. Makino	613
SSM-Thixoforging Process with Adaptive CNC Yu.A. Gladkov, Yu. Bocharov, R. Kopp, D. Abel	615

Tribology

INVITED PAPER

Preliminary assessment of the influence of surface micro-geometries on friction R. Balendra, M. Rosochowska, K. Chodnikiewicz, R. Smith	619
<i>INVITED PAPER</i>	
Testing of environmental friendly lubricants for sheet metal forming N. Bay, D. D. Olsson, J. L. Andreasen	621
Novelty of tip test for friction measurement Y. T. Im, S. H. Kang, H. C. Lee, J. S. Cheon, S. Y. Kim	623
Experimental and theoretical evaluation of roll gap friction mechanisms in cold rolling H. Pawelski	625

The effects of oil concentration and droplet diameter in oil-in-water emulsion on strip rolling P. B. Kosasih, A. K. Tieu, W. H. Li, C. Lu	627
A friction model for metalforming simulation using a geometric approach H. J. Jeon, A. N. Bramley	629
Measurement of friction force in free bulging pulsating hydroforming of tubes K. Mori, T. Maeno, M. Bakhshi-Jooybari, S. Maki	631
Direct friction measurement in Draw Bead Testing D. D. Olsson, N. Bay, J. L. Andreasen	633
Normal pressure and friction stress measurement in rolling processes P. Henningsen, M Arentoft, J. Lagergren, N -G Jonsson, T. Wanheim, W Precz	635
Improvement of tribo-testing method based on combined forward-backward straight can extrusion Y. Sagisaka, T. Nakamura, S. Tanaka, K. Hayakawa	637
Estimation of friction and heat transfer at cooling for prediction of hot forging die life M. Sawamura, T. Tanaka, Y. Yogo, K. Nakanishi, T. Suzuki, A. Watanabe, N. Miyajima	639
Comprehensive approach to film formation, pollution and heat transfer in hot die lubrication L. Yang, C. Liu, R. Shivpuri,	641
Evaluation of lubricants for cold forming of titanium alloy by tapered-plug penetrating test K. Kitamura, A. Shishikura, K. Tsuzuki, K. Nagata	643
Conical tube-upsetting test – a new method for accurate determination of the friction coefficient R. Kopp, M. Albaoui, R. Volles	645

Warm Forging

Forming of magnesium sheet metal B. A. Behrens, O. Vogt, J. Poelmeyer	649
Warm hydroforming of magnesium sheets - results and microstructural changes M. Geiger, M. Merklein, J. Hecht	651
Evaluation of drawability at warm and hot magnesium sheet forming with real time control of blank holding force D. K. Choo, C. G. Kang, J. H. Lee	653
Process analysis for deep drawing of tailored heat treated blanks M. Kerausch, M. Merklein	655
Investigations on the sheet forming of magnesium alloys Y. C. Xu, S. H. Zhang, W. T. Zheng, L. Tricarico, G. Palumbo, D. Sorgente	657
Warm formability of AZ31 magnesium sheets Y. Chastel, V. Nalewajk, J. Signorelli	659

Poster Session: Numerical Simulation

- Tube flow formability simulation 663
M. H. Parsa, A. M. A. Pazooki, M. Nili Ahmabadi
- Forging preform design using ideal forming theory by considering boundary condition 665
M. H. Parsa, M Ghadamgahi-Kashan, A. Zarei-Hanzaki
- Design optimization of bevel gear forging based on fem simulation and kriging model 667
X. W. Chen, J. Chen, X. Y. Ruan
- Improving the bending process of sheet metal laminates materials 669
A. Torregaray, C. Garcia,
- Finite Element Analysis of the compaction processes for hollow two-level (class III) components 671
B. B. Hwang, Y. H. Lee, D. H. Jang
- Texture evolution of sheet metal forming based on rate independent FEM analysis 673
S. R. Zhang, D. Y. Li, Y. H. Peng
- Optimization of blank design for sheet metal forming process using high and low fidelity simulation 675
R. Hino, Y. Asano, F. Yoshida, V.V. Toropov
- Metal forming analysis by a rigid plastic meshless collocation method 677
H. Dalayeli, M. Farzin, H. Hashemolhosseini
- Finite element analysis of cold upsetting of cylinder by different dies 679
D. Vilotić, M. Plančak, K. Kuzman, D. Čupković

Poster Session: Bulk Metal Forming

- Hot forging comparative analyses by using a combined Finite Element Method 683
Y. M. Guo, K. Nakanishi, Y. Yokouchi
- Tool design and fem calculation for the calibration process 685
P. F. Juette
- Study on preparation technique of semi- solid AZ61 alloy by SIMA 687
H. Yan, M. F. Fu, Q. Hu, W. Q. Nie, Z. M. Zhong
- Explosive cladding and sintering: bi-material hot forging tools? 689
L. Langlois, R. Bigot, L. Lazzarotto
- Characteristics of hydrostatic extrusion for magnesium alloy AZ31 691
D. J. Yoon, Y. W. Seo, C. Cho, K. H. Na
- SSM-thixoforging unit design requirements 693
Yu. Bocharov, B. Semenov, K. Kushtarov, Yu. Gladkov, L. Khizhniakova
- Infra-red measurement of temperature during the friction stir welding process and correlation with numerical simulation 695
T. De Vuyst, L. D'Alvise, S. Beccari, L. Fratini

Suppression of surface cracking in hot working of steels containing copper C. Nagasaki	697
Superplastic nanoforging of metallic glass with dies fabricated by focused ion beam Y. Saotome, S. Okaniwa, H. Kimura, A. Inoue	699
Coupling hot forming and cooling operations in numerical and physical simulation S. Bruschi, S. Casotto, P. F. Bariani	701

Poster Session: Sheet Metal Forming

A finite element analysis of the laser forming process: influence of spot dimension on discretization, temperature, and deformation field P. Carlone, G. S. Palazzo, R. Pasquino	705
Recent developments in multi-point forming technology M.-Z. Li, Z. -Y. Cai, C. -G. Liu, W. -Z. Fu	707
Deforming characteristics of GA steel sheet and its application in the forming of body side outer panel X. P. Chen, X. B. Chen, H. M. Jiang, C. H. Li, W. J. Feng, F. Z. Sun	709
An approximate analytical model for the calculation of springback after mechanical expansion of the cylindrical pipes B. F. Guo, M. Jin, Q. Li, S. M. Nie	711
Elucidation of cutting mechanism with scissors K. Inoue, M. Motomura, T. Imura, T. Sonoda	713
Study the possibility of manufacturing an automotive body part using sheet hydroforming process M. H. Parsa, P. Darbandi	715
New development of K-shape aluminum components by means of tube hydroforming M. F. Li, P. K. Cheng, C. Y. Chuang, C. C. Huang	717
Room temperature deformation of $Zr_{65}Al_{10}Ni_{10}Cu_{15}$ bulk metallic glass sheet including nano-sized crystalline phases under hydraulic pressure H. G. Jeong, W. J. Kim, D. J. Yoon, S. J. Lim, S. Choi	719

Poster Session: Rolling

Experiment and simulation-based studies for enhancement of material strength in cold cross wedge rolling process H. W. Lee, G. A. Lee, S. Choi, D. J. Yoon, N. K. Lee, S. J. Lim, S. M. Bae	723
Modelling of oxide scale crack in hot strip rolling J. Tang, A. K. Tieu, Z. Jiang	725
Feasibility of production of wooden sheets from wood powder without adhesive by rolling process T. Miki, N. Takakura, T. Iizuka, K. Yamaguchi, H. Imanishi, K. Kanayama	727

Research on the principle of twin cone rollers axle mill & the calculation of the force and energy while axial rolling
Z. Shaohua, X. Wei, Z. Meng, J. Hung 729

Poster Session: Material Modelling & Testing

Experimental method for determination of kr curve of metal plate compact tensile samples
Q. F. Zhu, Z. M. Sun, F. S. Wang, W. Yao, G. C. Huang 733

Crystallographic orientation observation and mechanical properties evaluation of fine-grained pure aluminum
T. Sakai, R. Takahashi, T. Furushima, K. -I. Manabe, H. Morimoto, E. Nakamachi 735

Application of materials mesomechanics in metal materials research
Q. Zhu, Z. Sun, F. Wang, W. Yao, G. Huang 737

MEMS material mechanical property measurement using long elongation piezo actuating measuring system
H. J. Lee, H. W. Lee, N. K Lee, S. J Lim, J. H. Hwang 739

Poster Session: CAE & Knowledge Engineering

Rapid tooling of complicated ceramics based on CAD/CAE/CAM/RP
Y. S. Sun, Z. R. Zhang, X. T. Pan, X. T. Xiao, J. G. Hu, Y. H. Xu, Z. F. Zhou 743

The development of a material property collection and distribution system
D. J. Mynors, P. Broomhead, R. J. Grieve 745

Poster Session: Tribology

Experimental and fea of thermal contact conductance to control the surface qualities of Al6061 hot forged part
J. H. Lee, J. W. Kwon, Y. N. Kwon, S. W. Kim, Y. S. Lee 749

Modeling of asperity ploughing at the interface of metal forming
C. Lu, A. K. Tieu, H. Zhu, H. Ren 751

Modeling of heat transfer and fluid flow in continuous casting of steel
Z. Malinowski, M. Rywotycycki, T. Telejko 753
